

# Perimeter Security Alone Isn't Enough to Prevent Loss, Risk, and Disruption

# \$18M

Lost everyday to cargo and supply chain theft

AMERICAN  
TRANSPORTATION  
RESEARCH INSTITUTE

***“If the  
perimeter fails,  
contracts fail.”***

— PERIMETER AI —

**YARDS AND DOCKS ARE WHERE ASSETS, PEOPLE, AND OPERATIONS ARE MOST EXPOSED**

**Inventory shrink places significant financial strain on businesses, but in high-risk industrial environments, the stakes go beyond theft. Safety incidents, compliance failures, and operational disruptions can have far-reaching consequences across warehouse operations, job sites, and critical infrastructure.**

The real damage goes far beyond the cost of a stolen asset, including:

- Delayed, canceled contracts or business loss
- Escalating insurance premiums costs
- Regulatory penalties, compliance failures, and audit exposure
- Losses in revenue, workforce safety, and customer trust

Traditional security — gates, video cameras, and patrols — can help deter theft, but they have limits in preventing intrusions and identifying safety risks across large or remote perimeters.

Barriers can be breached. Guards can't be everywhere at once. And cameras often capture incidents — whether theft or safety events — only after they happen.

**By the time you know there's a problem, it's already too late.**

At Nighthawk Security, we know cameras alone don't stop theft. And they don't protect your bottom line. That's why we've partnered with CHeKT to deliver a smarter, prevention-first approach that stops loss and disruption across your perimeter, docks, and gates before it impacts your business.

# A Smarter Way to Protect Your Perimeter and Everything In It

**Traditional security reacts after the fact.**

**CHeKT Proactive Visual Security helps stop theft and identify safety risks before they disrupt your operations.**

AI-powered detection, live video verification, and automatic deterrence work together to identify and respond to threats and safety incidents as soon as they begin, providing centralized visibility across distributed operations.

For organizations operating in regulated, high-risk environments, this creates a consistent layer of oversight that helps reduce liability, support compliance, and prevent escalation of issues.

With CHeKT, instead of reviewing footage after a loss, you can:

- ✓ Detect suspicious activity instantly
- ✓ Verify events in real time
- ✓ Provide police with verifiable proof
- ✓ Intervene before theft occurs

Think of CHeKT Proactive Visual Security as a strategic investment in the safety, stability, and long-term success of your business.

## HOW CHeKT STOPS THEFT IN REAL TIME:

- ✓ **24/7 Threat Detection:** AI-powered analytics and multi-site visibility reduce false alarms, identify suspicious activity and safety risks, and trigger instant alerts.
- ✓ **Active Deterrence:** Audio warnings, lighting, and visual alerts interrupt threats and help prevent unsafe conditions in real time.
- ✓ **Customizable Alarm Zones:** Focus protection on high-risk areas with real-time intrusion monitoring.
- ✓ **Response and Apprehension:** Operators instantly verify events, escalate safety incidents, and coordinate faster, more accurate responses.

## WHAT THIS MEANS FOR YOUR BUSINESS:

- ✓ **Protect Revenue:** Keep inventory secure and reduce exposure to loss and disruption.
- ✓ **Improve Safety Outcomes:** Identify risks early and help prevent incidents that could harm employees or contractors.
- ✓ **Reduce Compliance Pressure:** Support audit readiness and reduce exposure to regulatory penalties.
- ✓ **Maintain Operations:** Avoid costly downtime and keep teams and services running smoothly.
- ✓ **Lower Security Costs:** A cost-efficient alternative to full-time guards.

## PROACTIVE SECURITY TOOLS YOU CAN USE

### Smart cameras

Detect suspicious activity & send real-time alerts

### AI analytics to alarms

Turn video proof into actionable events

### Remote monitoring

See what triggered an alarm & respond instantly

### Online interface

Verify events & dispatch quickly

### Arm or disarm on the go

Manage security from anywhere in seconds

### Smart zones

Easily define & focus on high-risk areas

### Active deterrence

Automated audio & lights stop threats in progress

### 24/7 virtual guard

Extend coverage across sites & shifts

**Protect your perimeters. Protect your bottom line.**
