

# Keep Staff, Cash, and Inventory Protected Before Security Incidents Occur

# 4.5%

**of ALL crime  
nationwide occurred  
at convenience stores.**

— FBI —

***“Restaurants are common targets for violent crime, which account for 21% of all workplace robberies.”***

— OSHA —

## FOR RESTAURANTS & CONVENIENCE STORES, SECURITY CHALLENGES GO BEYOND THEFT

**When theft occurs, it's more than a line-item expense. It impacts employees, customers, and your bottom line.**

“Flash mob” incidents by organized crime and “gas and dash” theft are on the rise, and are often met with limited or delayed police response — leaving operators exposed to huge losses, including:

- ✓ Reparations for employee or customer injury
- ✓ Rising insurance premiums and security costs
- ✓ Reputational damage in the market
- ✓ Operational disruption and loss of continuity

Traditional video surveillance security — cameras and on-site guards — can help deter incidents, but they have limits, especially after hours when staff may be alone.

Coverage has gaps. Guards can't be everywhere at once. And conventional cameras help document incidents but were never designed to prevent theft or harm.

**By the time you know there's a problem, the damage has already been done.**

At Nighthawk Security, we know cameras alone don't stop theft. And they don't protect your bottom line. That's why we've partnered with CHeKT to deliver a smarter, prevention-first approach that stops crime before it disrupts your business or endangers your customers and staff.

# A Smarter Way to Improve Safety Across Your Restaurants and Retail Chains

**Traditional security reacts after the fact.**

**CHeKT Proactive Visual Security can stop theft or harm before it happens.**

AI-powered detection, live video verification, instant alerts, and automatic deterrence work together to identify and respond to threats as soon as they begin. Manage everything from a monitor or mobile app and, using your existing security systems, improve employee and customer safety at every location.

With CHeKT, instead of reviewing footage after an incident, you can:

- ✓ Detect suspicious activity instantly
- ✓ Verify events in real time
- ✓ Provide police with verifiable proof
- ✓ Intervene before theft or injury occurs

Think of CHeKT Proactive Visual Security as a strategic investment in the safety, stability, and long-term success of your business.

## HOW CHeKT STOPS CRIME IN REAL TIME:

- ✓ **24/7 Threat Detection:** AI-powered analytics and multi-site visibility reduce false alarms, identify suspicious activity, and trigger alerts.
- ✓ **Active Deterrence:** Audio warnings, lighting, and visual alerts interrupt threats before they escalate.
- ✓ **Customizable Alarm Zones:** Focus protection on high-risk areas with real-time intrusion monitoring.
- ✓ **Response and Apprehension:** Operators instantly verify events and coordinate faster, more accurate law enforcement response.

## WHAT THIS MEANS FOR YOUR BUSINESS:

- ✓ **Protect Customers and Employees:** Reduce risk and improve safety during security incidents.
- ✓ **Reduce Insurance Pressure:** Fewer incidents can lead to smoother claims and lower premiums.
- ✓ **Maintain Operations:** Avoid costly downtime and keep teams and services on track.
- ✓ **Lower Security Costs:** A more scalable, cost-efficient alternative to full-time guards.

## PROACTIVE SECURITY TOOLS YOU CAN USE

### Smart cameras

Detect suspicious activity & send real-time alerts

### AI analytics to alarms

Turn video proof into actionable events

### Remote monitoring

See what triggered an alarm & respond instantly

### Online interface

Verify events & dispatch quickly

### Arm or disarm on the go

Manage security from anywhere in seconds

### Smart zones

Easily define & focus on high-risk areas

### Active deterrence

Automated audio & lights stop threats in progress

### 24/7 virtual guard

Extend coverage across sites & shifts

**Protect your restaurants and retail chains. Protect your bottom line.**
